2. Composition/Data on ingredients

Chemical characterization:**Description:** Mixture of below-mentioned substances with innocuous additions.

Hazardous ingredients:			
CAS: 1314-13-2 EINECS: 215-222-5	Zinc Oxide	N; R 51/53	10 – 15 %
CAS: 7664-38-2 EINECS: 231-633-2	Ortho-Phosphoric Acid	C; R 34	> 50 %

3. Hazards identification

Hazard designation:

N Hazardous to the environment

C Corrosive

Special danger warning for human and environment:

The product has to be labelled due to the calculation procedure of the „EU-Directive of the General Classification of Preparations“ in the latest valid version.

R 34 Causes burns

R 51/53 Very toxic to aquatic organisms may cause long-term harmful effects in the waters.

Classification system:

The classification is in compliance with the current EU-lists, but is also completed with details given by technical literature and company.

4. First aid measures

General information:

- **After skin contact:** Remove contaminated clothes immediately.
- **After eye contact:** Remove with soap by washing under the running water. Immediately flush opened eye under running water for several minutes (at least 10 min.), get prompt medical attention.
- **After swallowing:** Drink plenty of water, do not induce vomiting (danger of perforation), and consult a physician immediately.
- **After inhaling:** Not applicable.

5. Fire fighting measures

Suitable extinguishing**agents:** Not applicable**Special protective equipment:** No special measures are required

6. Accidental release measures

Person-related safety**precautions:**

Wear personal protective clothing.

Environmental precautions:

Inform responsible authorities in case of spillage into waters or sewage system. Dilute with plenty of water.

Methods of cleaning up:

Absorb with liquid-binding material (chemical binders; use cellulose for

Additional information:	small amounts). Use neutralizing agent. See chapter 8 for information about personal protective equipment. See section 13 for disposal information.																																				
7. Handling and storage																																					
Handling:	The product is only for dental use.																																				
- Information about safe handling:	Keep containers tightly closed.																																				
- Information about protection against explosion and fire:	No special measures are required.																																				
Storage:																																					
- Information about storage:	Store dry and tightly closed in original container.																																				
- Information about storage in one common storage facility:	Not required.																																				
- Requirements for storage rooms:	No special requirements.																																				
8. Exposure controls and personal protection

Technical protective measures: Not required.																																					
Personal protective equipment:																																					
Respiratory protection: Not required.																																					
Skin protection: Wear suitable protective gloves; the glove material has to be impermeable and resistant to the product/the substance/the preparation. Due to absent tests no recommendations about the glove material can be given for the product/the preparation/the chemical mixture. The selection of the glove material should be in consideration of the breakthrough time, kinds of permeation and the degradation.																																					
Material of gloves: The selection of the suitable gloves does not only depend on material but also on further quality characteristics and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has to be checked prior to the application. Suitable glove material is e. g. butyl rubber, fluorocarbon rubber (Viton), natural rubber (Latex). For the permanent contact of a maximum of 15 minutes gloves made of PVC or PE are suitable.																																					
Penetration time of glove material: The exact breakthrough time is to be obtained from the manufacturer of the protective gloves and has to be observed.																																					
Eye protection: Protective goggles with side protection are recommended.																																					
Body protection: Lightweight protective clothing.																																					
General protective and hygienic measures: The usual precautionary measures for contact with chemicals are to observe.

Hoffmann Dental Manufaktur GmbH

10. Stability and reactivity

Conditions to be avoided: No decomposition according to regulations.
Hazardous reactions: No hazardous reactions are known.
Hazardous decomposition products: No hazardous decomposition products are known.

11. Toxicological information

Values given below refer to basic substance Phosphoric Acid.

Acute toxicity: In our experience the product does not cause any noxious effects when used and handled according to regulations.

LD50 (dermal rabbit): 2740 mg/kg (referring to pure substance)
LDLo (oral, rat): 1530 mg/kg (referring to pure substance)
LC50/4h (relating to inhalation, rat) > 850 mg/l (referring to pure substance)

Specific symptoms in animal experiments:

Test for eye irritation (rabbit): Corrosive effect
Test for skin irritation (rabbit): Corrosive effect

From subacute to chronic toxicity :

Sensitisation:
Research on human: No sensitisation effect
Mutagenicity:
Ames-Test: Negative; no mutagenic effect.

Irritation effects on human:

- **Swallowing:** Strong corrosive effect on mouth and throat.
- **Skin:** Corrosive effect.
- **Eye:** Strong corrosive effect.

12. Ecological information

Referring to main substance:
Biological decomposition: Is not determined.
Ecotoxicological information: Quantitative data about ecological effects are not available for this product.
Biological effects: Very toxic to aquatic organisms. May cause long-term harmful effects in the waters.
General information: Prevent releasing into waters, sewage system and soil.
Water hazard class 2 (self-assessment): hazardous to waters.

13. Disposal details

Product: Do not dispose of together with domestic waste.
Prevent releasing into sewage system.
Uncleaned packaging: Dispose of in accordance with official regulations.

European Waste Catalogue

06 01 04 Phosphoric acid phosphorous acids

14. Transport information

Land transport ADR/RID and GGVS/GGVE (cross-border/national):

ADR/RID-GGVS/E class: 8 (C1) corrosive substances
Kemler-Number: 80
UN-Number: 1805

15. Regulations

Labelling according to EU-Directive:

The product has been classified and labelled in accordance with EU-Directives / Ordinance on Hazardous Materials

(GefStoffV)

Labels:

N Hazardous to the environment
C Corrosive

Risk phrases	34 Causes burns 51/53 Very toxic to aquatic organisms, may cause long-term harmful effects in the waters.
Safety phrases:	20 Do not drink and eat when using. 24 Avoid skin contact. 25 Avoid eye contact. 26-28 In case of eye contact get prompt medical attention; contaminated clothing must be removed immediately; in case of skin contact wash skin with plenty of water immediately. 36/37/39 Wear suitable protective clothing, gloves and eye/face protection. 45 In case of accident or if you feel unwell consult a physician immediately. 57 Use appropriate container to prevent environmental contamination.

National regulations:

Water hazard class: 2 (hazardous to the waters), self-assessment.

16. Other information

This information is based on our present knowledge. However, they do not represent a guarantee for any product features and do not establish a contractual relationship. It is to emphasize that there are no warnings at all about human health risks by Zinc Oxide as far as the product is used according to regulations.
